

WICKR, AUCCLOUD & CISTECH

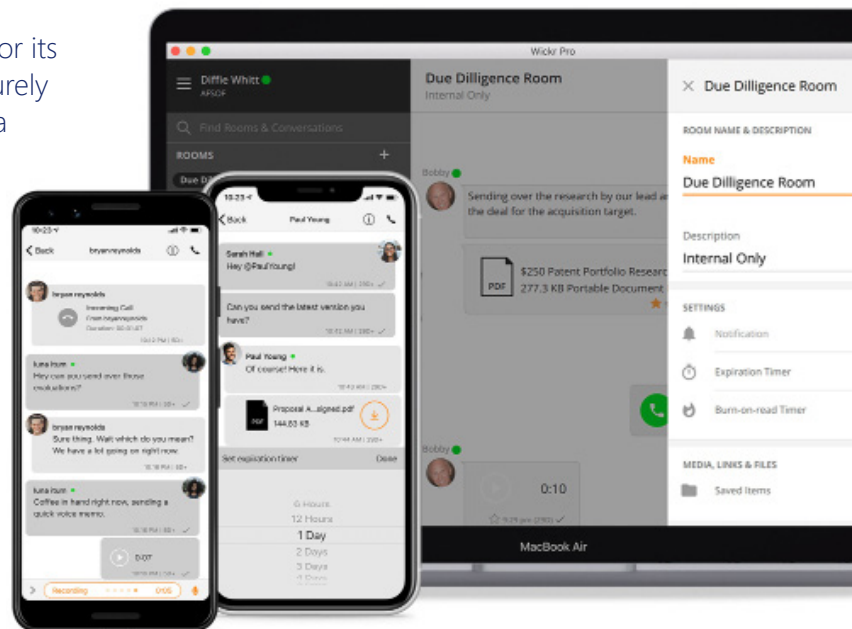

Leading End-to-End Encryption Collaboration Platform

Wickr Inc, the secure collaboration platform known for its strong end-to-end encryption and the ability to securely operate on Zero Trust Networks (ZTN), has entered a strategic partnership in Australia with CISTECH and AUCloud, Australia's sovereign cloud Infrastructure-as-a-Service (IaaS) provider, to bring secure collaboration and communications to Australia's government.

Australia's government and critical infrastructure providers need a solution partner that can offer a vehicle for secure communication to control sensitive information, protect employees, and meet compliance, data protection and retention requirements. Through AUCloud, which focuses exclusively on meeting the needs of the Australian government and Critical National Infrastructure (CNI) communities at the PROTECTED Level, the Wickr platform uniquely meets the highest standards for data management and security required for the government.

With its increasing dominance in the secure communications field, Wickr has made a leap forward in the company's ability to provide secure communications anywhere, anytime, on any platform, and with global reach.

ONE SOLUTION. INFINITE POSSIBILITIES.

The Power of Wickr, CISTECH Solutions and AUCloud

- Provides multi-tenanted Secure Encryption Communications hosted on a Sovereign PROTECTED cloud.
- Purpose built for enterprise deployments with global administration rights performed by CISTECH with delegated administrative functions performed either by CISTECH or by the agencies themselves.
- Allows clients to collaborate securely with authorised agencies and partners.
- Designed to meet communication and archiving compliance requirements.
- Supported both on mobile and desktop clients.
- Hosted within T4 data centres, supported by Australian security cleared personnel; and
- No data leaves Australia.

About Wickr

Fully encrypted. Enterprise-ready. Private. Set up in minutes and invite your team to join your private Wickr Network.

Control and protect your most critical communications. Wickr's end-to-end encrypted platform offers features like: Voice & Video Calls, File transfer, SSO and MDM integration, Bots, full administrative controls and a whole lot more.

Wickr believes the highest results are born from different perspectives. That is why they strive to work with the best minds in security and the most innovative thinkers in technology. Wickr's mission is to transform the way companies and organizations use and build systems that protect valuable, high target data.

About AUCloud

AUCloud is Australia's sovereign cloud Infrastructure-as-a-Service (IaaS) provider, exclusively focused on the Australian Government (Federal, State and Local) and Critical National Industry (CNI) communities. AUCloud provides superior security assurance. We are owned and operated in Australia by security cleared Australians. All our services and the data we manage remains in Australia – ALWAYS. Our Community Rules Information Security Policy (CRISP) guarantees higher security of everyone's data and distinguishes our service in the market.

AUCloud solutions enable our customers to benefit from sovereign data protection with the scale, automation, elasticity and lower costs typically associated with global cloud offerings.
